## **DETAILED ACTION**

## Response to Arguments

Applicant's arguments filed 1 September 2004 have been fully considered but they are not persuasive.

In response to the applicant's argument that the strip 72 of Cammarota is actually a simulated fly opening, it is noted that the graphic labeled 72 comprises a strip having a different color than the remainder of the backsheet and therefore fulfills the limitations of the claim.

In response to applicant's argument that Cammarota discloses no correlation between the strip and the wetness indicator, a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. The strip 72 of Cammarota is located proximal the wetness indicator 66, a user must merely look in the vicinity of the strip to locate the wetness indicator, and therefore is fully capable of facilitating location of the wetness indicator.

In response to the applicant's argument that Cammarota fails to disclose the strip being a separate strip of material from the backsheet, it is noted that the strip 72 is located on a separate piece of material 112 from the backsheet 110.

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Application/Control Number: 09/879,151

Art Unit: 3761

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-11, 18-25, 27-41, and 43 are rejected under 35 U.S.C. 102(e) as being anticipated by Cammarota et al. (6,307,119).

With respect to claim 1, Cammarota discloses an absorbent article comprising a liquid pervious topsheet 42, a liquid impervious backsheet 40, and an absorbent body 44. The liquid impervious backsheet 40 comprises a strip part 72, as shown in figure 1, the strip part 72 being integral and having a different color than the backsheet 40. A wetness indicator 66 is arranged on an inside of the backsheet 40, as disclosed in column 16, lines 29-31, and is applied adjacent the strip part 72, as shown in figure 1. Since the wetness indicator 66 is located adjacent the strip part 72, the strip part 72 is fully capable of facilitating location of the wetness indicator 66 due to their proximity to one another.

With respect to claim 2, Cammarota discloses an embodiment having the strip part 72 located on a separate strip of material 112 fastened on the inside of the backsheet 110, as shown in figure 9B. A plurality of wetness indicators 66 are arranged on the inside of the backsheet 110 and are visible through the backsheet 110, as disclosed in column 21, lines 41-48, and are applied adjacent the strip part 72, as shown in figure 1. Since the wetness indicator 66 is located adjacent the strip part 72,

Application/Control Number: 09/879,151

Art Unit: 3761

the strip part 72 is fully capable of facilitating location of the wetness indicator 66 due to their proximity to one another.

With respect to claim 3, the wetness indicator 66 is applied adjacent the strip part 72 in an area of the backsheet 110 not covered by the strip part 72, as shown in figure 1.

With respect to claim 3, the strip 72 is fully capable of indicating the size or total absorption capacity of the article.

With respect to claims 5, 19, 28, and 35, the strip 72 extends at least an essential part of the length of the article, as shown in figure 1.

With respect to claims 6, 20, 29, and 36, the strip 72 has a dimension in the transverse direction of the article, and the article is fully capable of being folded along the strip 72.

With respect to claims 7, 10, 11, 21, 24, 25, 30, 33, 34, 37, 40, and 41, the wetness indicator 66 has a width of between about 1.5 cm and 3 cm, as disclosed in column 11, lines 25-27. The strip 72 has a width of approximately the size of the wetness indicator 66, as shown in figure 1, and therefore has a width within the range of 1 cm to 8 cm.

With respect to claims 8, 22, 31, and 38, the article further comprises printed symbols "big boy" or "big girl," as disclosed in column 7, lines 13-14, which are capable of indicating the size or type of the product.

With respect to claims 9, 23, 32 and 39, the article is a diaper or incontinence guard.

Application/Control Number: 09/879,151

Art Unit: 3761

With respect to claims 18, 27, and 43, the wetness indicator 66 is disposed on the remaining part of the backsheet 40.

## Allowable Subject Matter

Claims 17, 26, and 42 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: The prior art of record fails to disclose the wetness indicator being disposed on the strip. The closest prior art of record, Cammarota, discloses the strip 72 being a separate element from the wetness indicator 66, as shown in figure 1, and does not suggest combination of the strip 72 and wetness indicator 66. Therefore, Cammarota does not disclose or fairly suggest the claimed invention.

#### Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later

than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to C. Lynne Anderson whose telephone number is (571)

272-4932. The examiner can normally be reached on Monday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Tanya Zalukaeva can be reached on (571) 272-1115. The fax phone

number for the organization where this application or proceeding is assigned is 571-

273-8300.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a

USPTO Customer Service Representative or access to the automated information

system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
